

When the morning comes, the sun rises from the east.

When the sun rises, the whole earth is brightly lit up.

Because of the sunlight, people, animals,
and plants are able to live.

There is a rainbow in the sky. After a rainy day,
you can see the rainbow in the sky.

God made the rainbow, too.

When it becomes night, the moon lights up the dark sky.
The moon becomes larger and smaller as it becomes
a crescent moon, a half moon, and a full moon.
When the moon becomes larger, then smaller,
that means that one month has passed.

In the night sky, there are twinkling and shining stars.

Because there are as many stars as there are grains of sand in the ocean, it is impossible to count them all.

People see the positions of the stars and can tell in which direction they are going and what season they are in.

God made the sun, the moon, and the stars.

If this seed wants to grow, what do you think it needs?

“Namwoo, if this seed wants to grow, what do you think it needs?”

Namwoo thought about this carefully.

“Water, sunlight, dirt…… for a small seed to grow, it needs many things!”

“Now, why don’t we plant the seed?”

After putting dirt and the seed in the pot, Namwoo carefully put the pot on the windowsill, where there was a lot of sunlight.

You can plant seeds just as Namwoo did! You can easily find seeds at a gardening store.

Pick the seeds with your parents and tell them what the seed needs to grow.

After looking at the sky for some time, draw the things that are in the sky.

Day

Explain the sky that you have drawn. What kind of things are in it?

Night

Explain the night sky that you have drawn. What kind of things are in it?

Joyful Activity

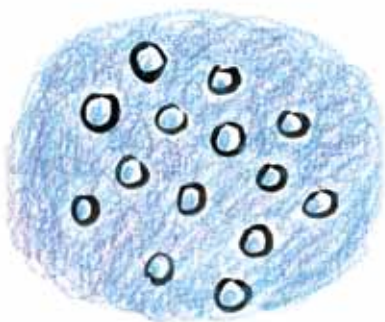

God made many things in the sky.

If this is something you can see in the day, then put a  around it.

If this is something you can see at night, then put a  around it.

If this is something that you can see at both day and night, then put a

 around it.
