

God made the trees and flowers. Chestnut trees, pine trees, oak trees, willow trees, apple trees, and many other kinds of trees. Trees give us delicious fruits and cool shade.

They even clean the air that we breathe! When we cut down trees, we can make closets and desks.

We can even light a warm fire with the wood.

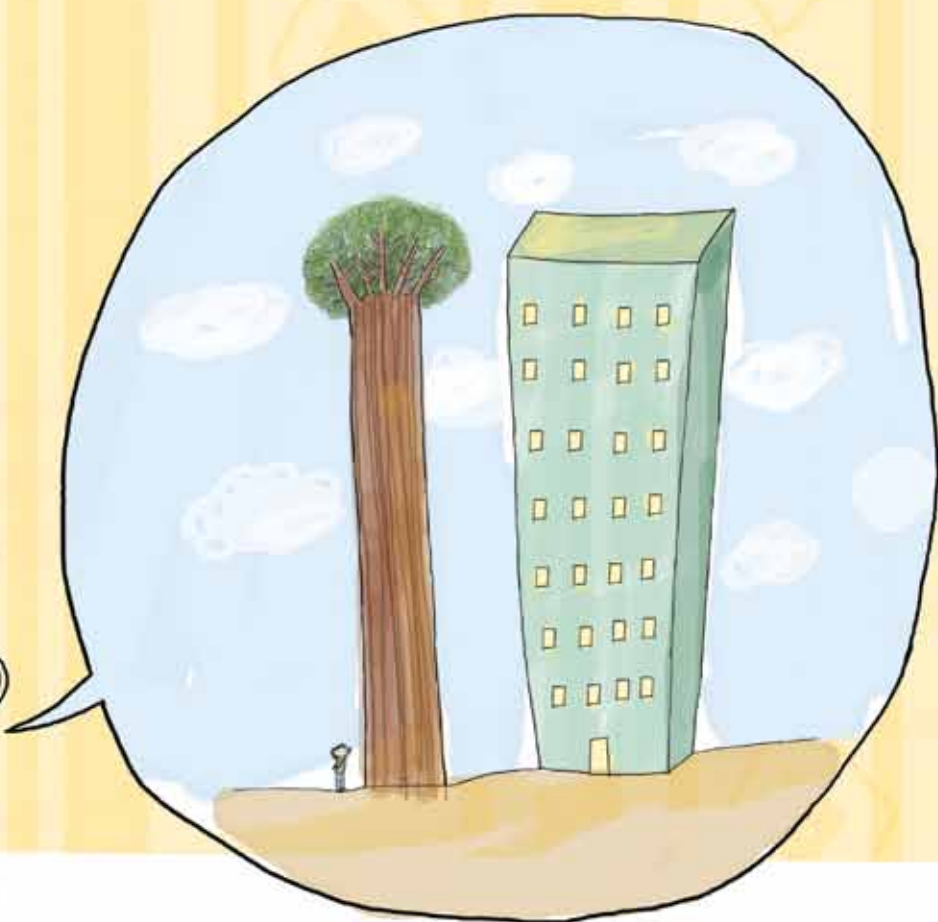

God made many beautiful flowers, too! Roses, tulips, azaleas, and lilies bloom beautifully. When it becomes winter, it looks like trees and flowers die. But when the warm spring comes around, trees turn green and flowers bloom once more. All these things are the work of God's hands.

## ***What is inside of a seed?***

Namwoo put his seed on top of the table. The seed was small and black. It smelled a little bit like dirt, and when he put his tongue on the seed, there was no taste. When he looked closely, there were many small hairs growing all over the seed so it was a little disgusting, too.

“Teacher, what is inside this seed?”

“In the small seed, there is the chance that it will become a beautiful flower or a tall tree. You have to plant it first to see what grows from it.”

“Even though the seed is so small, such things can grow out of it?”

“Of course! Some seeds grow into trees that are as tall as buildings. What kind of tree do you think will grow out of this seed? Nam-woo, if you were a seed, what kind of tree would you like to be when you grow up?”

## Planting a seed

**Materials:** Flower pot, dirt, seed (you can buy these easily at a gardening store)

1. Prepare and observe the seed (What is the shape, color and size?).
2. Fill the flower pot with dirt.
3. After filling the pot with dirt, put the seed inside the dirt  
(Put 3 or 4 seeds, since one might not grow).
4. Put the seeds inside the dirt about 1-3cm deep. And water it.
5. You have planted the seed!
6. Until the seed grows into a plant, observe it and write your observations in a notebook.

**\* Place the pot where there is a lot of sunlight.**

What kind of plant will the seed grow into?

What shape is the seed?

What color is the seed?

# Joyful Activity

Which of these is the outer skin?  
Connect the two related plants.

When a fruit is deliciously ripe, what color is it? Color the fruits with pretty colors.

# Memory Verse

*Trace this verse:*

He has made everything  
beautiful in its time  
Ecclesiastes 3:11

*Write this verse:*

*To Teacher*

*To parents*
