

During the day
the sun shines so bright,
the sun is very hot.

But it's okay,
Because the cloud pillars
keep us cool.

It has become night time.
The night is so cold
that we shiver.
But it's okay.
Because a pillar of fire
keeps us warm.

“Ah, I’m hungry! Please give us something to eat!”
God brought down something that was white
and tasted of honey. The Israelites called it ‘manna’

“Ah, I’m so thirsty! Please give us some water.”
When Moses hit a rock with his rod , refreshing water
poured out.
All of these things were given by God.

Winning over difficult tests with courage

It is warm afternoon. "Wow! It's so beautiful!"

The round green tomatoes have come out from the leaves.

The tomatoes will get too hot. I will cover them from the sun.

Namwoo took scotch tape and newspapers and covered the windows so the sun won't come in.

“Hey Namwoo, Why did you cover the windows with newspapers?” Asked his curious dad. “Well dad, it’s because the sun is too hot. The tomatoes will get too hot.” “Ah, I see. But to get red and delicious tomatoes, they must bravely survive in the heat of the hot sun. Just like this, in order for our son Namwoo to become a great child of God, you must also know how to win over difficult tests with courage.” Like his father said, Namwoo tried his best to become a good child of God.

Thinking Child

A sprout become a big tree, thanks to sun shine, water, and rich soil. But to grow into a strong tree, it needs one more thing. To be healthy and stay with other friends well, it is needed. That is “love.” When you see flowers or trees, try to say I love you. They will grow more beautiful. I love you!

There is someone who always tells us “I love you!” Think about who he might be.

What is the desert like?

It doesn't rain much in the desert so the land is dry. During the day it is burning hot, during the night it is freezing cold. The winds in the desert are so strong that they make sand dunes. There are trees around springs of water and they are called an oasis.

The feet of the camel are so flat that they don't sink in the sand. And their eyelashes are so long that the sand cannot get in. Camels are able to close their nose so the sand can't get in. The camel's back is able to store water and vitamins so that they can go a long time without eating.

There are other animals that are able to survive in the desert. The camel, the cactus, the rattlesnake, the owl, and etc. God created these plants and animals to survive well in the desert.

Joyful Activity

On these three dishes are pieces of manna.

4

1

4

If you put them all onto one dish, how many would there be?

Draw the same amount of manna on each place from the dish above.

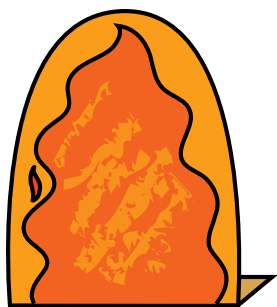

Making the Fire and Cloud Pillars

FUN CRAFT

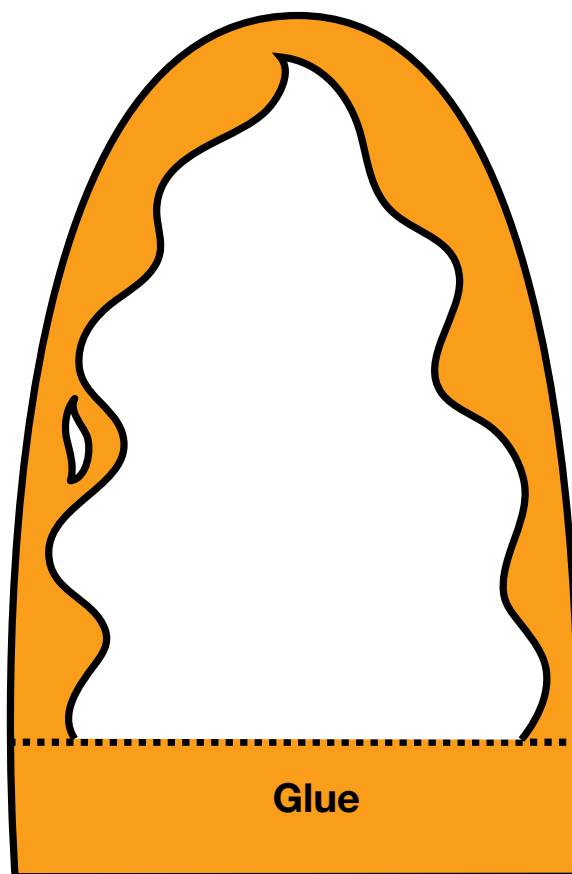

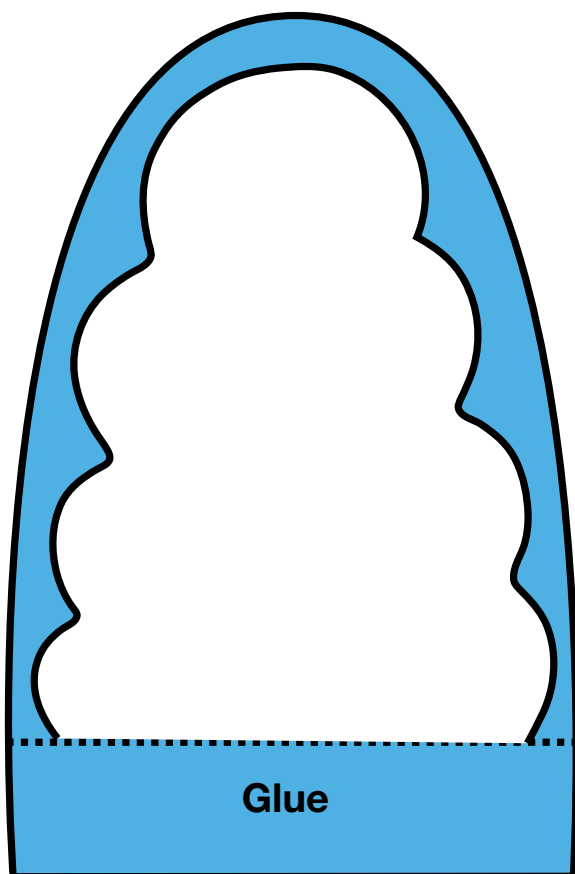

Color the fire and cloud pillars then cut them out. Then glue them into the right positions below.

- cut _____
- fold - - - - -

Glue cloud pillar here

Glue fire pillar here

Memory Verse

Trace this verse:

I send an Angel
before you to keep
you in the way
Exodus 23:20

Write this verse:

To Teacher

To parents
